

ABOUT US

Baral Chemical Company Ltd is the leading and only local manufacturer of building and any other construction oriented chemicals and materials with extra-ordinary properties which are claimed better ones in comparison with respective field. Manufacturer of various types of building & Construction chemicals such as anti-salinity sealer, concrete admixtures with excellence, cementitious-grouting for concrete-joints, heat reducing & water proofing roof ,damp and water proofing liquid felt, cementitious alloy for water leakage, rust remover ,pest controlling products and any other constructional problem solving products which are truly for sound construction and healthy environment. Our Research & Development Department (R&D) has been analyzing, improving and adapting new invented technologies since 1986 to provide quality services for our honorable clients.

Pestonol

(Termite controlling Liquid)

Description of Item

Its ingredients make chemosterilised feelings, repellence & instant death of a few insects specially, efficiently and effectively destroys the colonies , stops food intake , prevent the growth & attack of termite including other earth habitant insects etc. when mixed up with soil its solubility gradient stands 3×10–28 Like potassium glass which is to say practically insoluble in water but good enough to get the effects non violate & permanent existence with silicone materials in soil; hence it continue the effects at least 20 (Twenty years), residual ingredients are micro-nutrients of the plants ; as a result its becoming very much environment friendly, per, permanent economic in long run & easy procedure to use for new construction.

Usages Area

Unappreciable colour after use, the prevention of growth and penetration of termite; efficiently and effectively destroy and prevents the attack of termite , cockroaches and other insects; non-violate and permanent existence in soil; environment friendly chemical, economic and easy procedure to use for construction. Generally usages in ground floor, plinth, outside trench of construction

Technical Data

Appearance	Light Gray Brownish Liquid
Specific Gravity	01±0.01 (Approx)

Storage

It has a minimum self live of 12 months provided temperature is keep within the range 10 ° C - 45 ° C. in normal & dry place. Please keep out of reach from children.

If spread in mouth or eyes, wash by much water; before taking food, hands should be washed out properly with soap or detergent.

Advantage

- Permanently prevention of termite
- Prevents the attack from earth habitant insects
- Non Volatile and permanent existence in soil
- Environment Friendly
- Easy to application

Usages Method & Coverage

a. Floor

After compaction the sand before soling sprays Pestonol equally on the floor. Then cast CC/RCC.

Mixing Procedure & Coverage: Water + Pestonol = 19 Liters + 1 Liter & 400 sft./Liter.

b. Outside Barriers

A trench (2' wide and 2' deep) will be dug around the plinth of the building. Spread Pestonol (Termite Controlling Liquid) equally on the surface of the trench. Fill up half of the trench. Spread Pestono the half filled trench by the same way. Then fill up whole trench with soil. Spread Pestono again on the surface of filled trench. Finally, cover the surface soil with brick soling, CC Tiles or layer of soil of 2" thickness.

Mixing Procedure & Coverage: Water + Pestonol = 19 Liters + 1 Liter & 60 rft./Liter.

Package

1Liter

Technical Support

Providing technical support and service on specify dosages, Chemical mixing, application method by perfect supervision
